

I. Audited graph

Illustrative · $\mathcal{K} = \{1, 2\}$ $h = 3$

Rejected $\chi_{04} = 0$

II. Rollout decision

$d = 2$

$$\hat{Q}_d(s, a) = \ell_{ja} + \hat{V}_{d-1}(f(s, a))$$

Action a	ℓ_{0a}	$\hat{V}_1(f(s, a))$	$\hat{Q}_2(s, a)$
1 (base)	2	6	8
2 (rollout)	1	$1 + 2 = 3$	4
3 (discard)	0.5	$+\infty$	$+\infty$

III. Retained completion

After $a^* = 2$

$$J_{\text{rollout}}(s) = 4 = \hat{V}_2(s) < \hat{V}_0(s) = 8$$
